

Heye Newsletter I, April 2017

INTRODUCTION

Dear customers and friends,

Spring is in the air and here at Heye we are looking forward to the coming months. We receive very good customer feedback from the last projects and like to say thank you for your cooperation. 2017 will again be an exciting year. The agenda for our Heye Symposium in June is now set and the international guest list starts to grow.

Yours,
Dirk Pörtner

HEYE SYMPOSIUM 2017 FOCUSES ON SMART PLANT

This year's Heye Symposium for international glass container industry customers will address a series of key challenges based on the theme "BSMART. MOTIVATE. OPERATE".

Representing a valuable opportunity to learn from a panel of international experts and exchange ideas, while also networking with fellow glassmaking professionals from around the world, this meeting takes place in Hamburg, Germany on 19-21 June 2017. The symposium will explore, for example, the digital progress realised by other manufacturing industries, with the chance to discuss existing and future possibilities for implementation in glass container production with leading authorities on the subject.

MORE THAN 70 MULTI-WEIGHT FEEDERS SOLD

Sampling and running small jobs becomes more and more important. The easy-to-run Heye solution for multiple gobs weights on one IS-Machines receives a very good customer feedback. What sets the Heye International solution apart from others is that the plunger and shear work in tandem with each other, ensuring that every gob is used and no energy is wasted.

Message in a Bottle

SMOOTHIE IN GLASS

Soothe digestion, heartburn, nausea, and other stomach trouble with the fresh ginger in this natural remedy smoothie recipe.

SERVINGS: 2

1 banana, sliced

¾ c (6 oz) vanilla yogurt

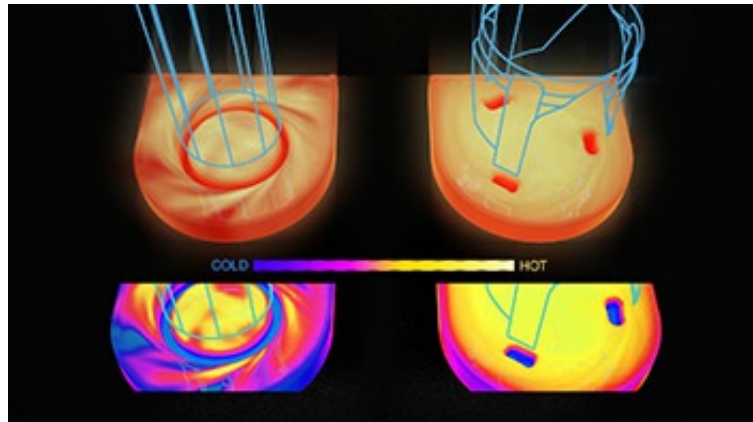

1 Tbsp honey

½ tsp freshly grated ginger

COMBINE the banana, yogurt, honey, and ginger. Blend until smooth. Enjoy.

The handling and operation are very simple and clear, so very little time is needed to achieve the desired result. In addition, the main, high-volume part of the production remains unaffected. [See video.](#)

HEYE ROTOR MECHANISM SETS STANDARDS IN RUSCAM GROUP

Rotating Tube

Heye Rotor

Leading Russian glass container producer Ruscam has standardised on the Heye Rotor Mechanism, equipping every feeder channel on all production lines with the proven technology. As important part of the international Sisecam Group, Ruscam produces approximately one million tons of glass packaging annually from five advanced manufacturing plants throughout the country.

Continuously improved to perfection by Heye International GmbH, the rotating movement of rotor segments within the Heye Rotor Mechanism provides excellent homogeneity of the glass and optimal weight consistency and so far became an integral part of success of the Heye NNPB Process. This servo-driven design guarantees reliable functionality, a long lifetime and is suitable for mounting on various feeder types.

At the five Ruscam plants, mechanisms have been fitted to production lines. “We standardised the Heye Rotor Mechanism in all our glassworks, as this mechanism is an excellent solution with regard to weight consistency and homogeneity”, says Ruscam Forming Department. [Learn more.](#)
