

Heye Newsletter III, December 2015

INTRODUCTION

Dear customers and friends!

One year more comes to an end. We look back at a very busy and successful year 2015: Busy as we ran several challenging projects. And successful as I can confirm that in cooperation with you we have made an good job! Many thanks for your confidence!

As time flies I hope you can spend some calm and reflective days with your family and friends considering what already Abraham Lincoln confessed: „In the end, it's not the years in your life that count. It's the life in your years.“

Yours,
Dirk Pörtner

REVIEW 2015 – GLASS IS COMING

This year has been a record year in Heye's history concerning the number of projects. Usually the projects are distributed regionally equally. However, this year the focus was on America. The Ardagh plant in Winchester has made a start with five IS-Machines in total. Further south followed by SIVESA in Mexico with a high-performance line for beer in Triple Gob. Brazil is the next station with two large projects in Estancia and in Rio de Janeiro. We will report more in January - You may be curious!

Argentina completes the picture in the South. Here we brought into operation several lines at Cattorini / Rigolleau. One highlight in Europe was the Ardagh plant in Gostyn, with three IS-Machines, one of them in Triple Gob.

Message in a Bottle
BLACK FOREST CAKE IN
GLASS

You want to enjoy a little piece of black forest cake but do not feel like baking a huge tart? Just try this recipe! It can be done easily and doesn't take up much time. Put some additional cinnamon into the sponge or the cherry mix to get a Christmas touch. Bon appetit!
